

## ROBOTAG LABELLING MACHINES

Robotag has developed a special Labelling Machine for the ornamental floriculture. This allows you to label flower and plant sleeves quickly, efficiently and automatically. One or more labels can be attached to each sleeve simultaneously. The Labelling Machine positions the labels extremely accurately, which allows all sleeves to be labelled identically. This gives your products the desired uniform appearance.

### THE BENEFITS OF ROBOTAG LABELLING MACHINES:

- || Rapid and flexible fully-automated labelling of all types of sleeves.
- || Tailor-made advice and Labelling Machine set up as standard.
- || Optimal operation and support thanks to our experience with the Labelling Service.

**MACHINE WITH DOUBLE HEAD**

The Labelling Machine is also available as a duo model. This machine can attach two labels to sleeves for flowers and plants simultaneously. This saves time and money.

**LABELLING UNIT**

The advanced label head ensures accurate positioning of the labels.

**EXTRA OPTION** Possibility to rotate the label 0 - 90 °.

**CONTROL UNIT**

Easy to set up and read all settings. In multiple languages available.

**INPUT AND OUTPUT UNIT**

The safe input and output of the sleeves is done manually and serves as a control moment in the process.

**SAFETY LIGHT CURTAIN**

The Labelling Machine stops automatically as soon as movement in the light curtain occurs.

TECHNICAL SPECIFICATIONS			
Size (L/W/H)	300x135x210 cm	Max. size sleeve	65x60 cm (LxW)
Weight	500 kg	Max. width label	104 mm
Output	1,0 kW	Safety light curtain on both sides of the machine	
Electrical connection	230V - 50Hz	Built according to CE standards	
Max. capacity	3.500 sleeves per hour
