

ROBOTAG LABELLING MACHINE WITH REFILL DRAWER

The Labelling Machine with refill drawer is ideal for smaller quantities. Using this drawer, your employee can refill the machine safely and efficiently while the Labelling Machine is operating. This allows you to label large batches of sleeves.

THE BENEFITS OF LABELLING MACHINE WITH REFILL DRAWER:

- || Rapid and flexible fully-automated labelling of all types of sleeves.
- || A drawer to position and refill the sleeves while the machine is operating.
- || Ideal for smaller quantities and capable of handling odd-sized sleeves.

ADDITIONAL OPTION

As an additional option, a vacuum pad with suction cups may be used for the processing of short sleeves up to a length of 15 cm.

LABELLING UNIT

The advanced label head ensures accurate positioning of the labels.

CONTROL UNIT

Easy to set up and read all settings. In multiple languages available.

REFILL DRAWER

The safe input and output of the sleeves is done manually and serves as a control moment in the process.

SAFETY LIGHT CURTAIN

The Labelling Machine stops automatically as soon as movement in the light curtain occurs.

TECHNICAL SPECIFICATIONS

Size (L/W/H)	300x150x180 cm	Max. size sleeve	55x45 cm (LxW)
Weight	300 kg	Max. width label	104 mm
Output	1,0 kW	Safety light curtain on both sides of the machine	
Electrical connection	230V - 50Hz	Built according to CE standards	
Max. capacity	3.000 sleeves per hour
