

## ROBOTAG LABELLING SERVICE

Robotag specialises in sleeve-labelling solutions for flowers and plants. We can take care of labelling your sleeves with our Labelling Service. Your needs, and indirectly those of your customers, are what count most. In addition, our service is reliability, accuracy, and flexibility.

### THE BENEFITS OF THE ROBOTAG LABELLING SERVICE:

- || We can label almost all types of sleeves fully automatically.
- || We can keep specific sleeves and labels in stock for you.
- || Our service is flexible, and is thus suitable for different types of product.
- || It is possible to uniformly attach one or more labels to the sleeves.

### COMPLETE LABELLING SERVICE

As a complete service we use our fully-automated Labelling Machine to label your chosen sleeves quickly, efficiently and accurately. The Labelling Machine can add one or more labels to each sleeve. The Labelling Machine positions the labels extremely accurately, which allows all sleeves to be labelled identically. Your batch of flowers or plants is guaranteed to have a uniform appearance.

### LABELLING SERVICE PRINT SHOP

With our Labelling Service Print Shop, we supply you with pre-printed labels in almost any desired size. We can pre-print these labels in your customers' brand colours for a professional and uniform appearance. We then can print the labels with any desired information, such as the EAN code, product name, price etc.

### SLEEVES AND LABELS

As an extra service Robotag can supply a wide range of blank sleeves and labels at low prices. We can supply many different types of materials. For example, we work with plastic labels in many colours, which are very resistant to wear, chemicals, heat and water. These are ideal for the floricultural sector.

### SUSTAINABILITY

We can work with sustainable and biodegradable packaging that is compatible with environmentally-friendly and responsible business practices.

### EASY PEEL LABEL

An easy peel label contains an easy-to-remove price sticker. However, care tips remain visible on the label.

### DOUBLE-SIDED LABEL

The front side contains sales information, with care tips on the reverse side. This is an ideal way of guaranteeing the quality of the product.
